

Managing Indoor Environmental Quality (IEQ) Leads to Green and Healthy Schools

Healthy Schools: Effectively Implementing an IEQ Management Program

Hear from Texas school district representatives and national IEQ experts on:

- Implementing a framework for effective healthy building maintenance and operation programs.
- Tying healthy building actions to wellness programs and asthma management.
- Making the connection between healthy buildings and academic achievement.
- Conducting thorough school walkthroughs.
- Controlling mold and other indoor pollutants.
- Getting buy-in from the school community and leveraging existing assets and securing sustainable funding.

Attend a **FREE**, one-day training on **May 12, 2011**, in **San Antonio, Texas**, to find the solutions!

How can your districts make green and healthy school buildings a priority? What are school districts across Texas and the Southwest doing to save money, improve health, and decrease student and staff absenteeism through simple, low-cost actions? Bring a team from your district and collaborate with each other and your peers from across the state to answer these questions.

Get the Details
